

EAWT JUNE 25-26, 2012: Complex wounds

June 25, a full day at Rothschild Hospital, 5 rue Santerre, 75012 Paris

A day on Complex wounds at Rothschild Hospital

During this day, an international panel will expose the different aspects and strategies when facing complex wounds. A wound is complex in several situations like difficulties of assessment, comorbidities, social or psychological disorders. This interactive day will present acute wounds and chronic wounds, new techniques to deal with infection and malnutrition, how to use new pressure relieving systems and use new techniques in extensive burn management.

June 26, complex wounds and emerging technologies in Excellence Center, 2 rue Diderot, 78990 Elancourt

Increasingly, as new technologies and products enter the field, the treatment of wounds becomes more efficient and successful. However, without proper usage and application of these technologies those benefits are lost.

The day course is aimed to provide each participant with a practical understanding of the correct handling of technologies relevant in surgical and non surgical wound healing, both in theory and in practice in surgical conditions.

Each participant will have the opportunity to practice and will be supported by our high qualified trainers. The technologies will be demonstrated in regard to their specific optimal mode of use. Variations of the mode of use may exist, and these variants will be detailed. Each device/technology will be demonstrated via video link just before the real hands-on workshop.

Expert monitors will evaluate the performance of the participants and help him/her to achieve a better understanding of possible technical pitfalls. Interactions with the expert monitors are encouraged. The rest of the program includes additional didactic presentations and clinical case studies.

Speakers : *P. Thoumy, S. Meaume, L. Téot, A. Piaggese, T. Wild, F. Gottrup, M. Edmonds, D. Armstrong, JM Rives, C. Shearmann, M. Romanelli, H. Partsch, R. Mani, H. Becquemin, D. Bensaid, R. Vandenbulk, I. Fromantin*

Registration and information:

Academy of Wound Technology

Scientific Committee:

Luc Téot

MD, PhD, Hôpital Lapeyronie, Montpellier, France.
Pr. Téot is qualified in Orthopedic and Plastic Reconstructive Surgery, Microsurgery

Sylvie Meaume

MD, Hôpital Rothschild, Paris, France.
Dermatology, Internal Medicine and Gerontology, Allergo-immunology.

Isabelle Fromantin

Institute Curie, France. Laboratory ERRMECe.
University of Cergy-Pontoise. PhD student Expert nurse, responsible for wound care unit.

Véronique Larreta Garde

University of Cergy-Pontoise, France.
Director of the laboratory ERRMECe.

Monday, June 25

Rothschild Hospital, Nation room

- 9.30 am Registration and coffee
10.00 am Introduction Pr. P. Thoumy, Past president CEPP HAS
10.10 am Definitions of complexity:
Medical point of view, S. Meaume
Surgical aspects, L. Téot
10.30 am Infected wounds:
Local and systemic management of spreading infection, Manchester
Management of infected diabetic foot, A. Piaggese
Management of open abdomen, T. Wild
Infected bone, F. Gottrup
11.30 am Complex Diabetic Foot Ulcer:
Diabetes complex wounds management, M. Edmonds
Complex offloading, D. Armstrong
12.15 am Lunch
1.15 pm Complex Trauma wounds:
Extended complex burns, JM Rives
Vascular reconstruction after trauma, C. Shearman
2.00 pm Complex Venous Leg Ulcer:
Rare venous leg ulcers, M. Romanelli
Complex compressive bandages, H. Partsch
2.30 pm Complex vascular wounds:
Complexity in vascular assessment, R. Mani
Complex revascularization, H. Becquemin
3.00 pm Complex pressure ulcers:
Pressure relieving systems, D. Bensaid
Complex dressings, R. Vandembulk
Complex malignant wounds, I. Fromantin
3.45 pm Coffee break
4.00 pm Wound technology presentations:
V-Loc, AMD, Integra, Recell, Urgo, Systagenix, KCI,
Smith&Nephew, 3M, Molnlycke
6.00 pm Presentation of surgical and not surgical workshops for
Elancourt
6.30 pm Departure to Elancourt by bus
8.30 pm Dinner

Thursday, June 26

Elancourt Excellence Center

- 7.30 am Coffee
8.00 am Workshops on operative and non invasive technologies
- Operative :
NPWT
Dermal substitutes
Debridement
Skin Grafts and Flaps
Wound closure/V-lock
 - Non Invasive :
Wound Assessment
Vascular Assessment
Dressings
Splints
Compressive garments
Compression
Pressure redistributing support surfaces
- 12.00 am Lunch break
1.00 pm Workshops on operative and non invasive technologies
- Operative :
NPWT
Dermal substitutes
Debridement
Skin Grafts and Flaps
Wound closure/V-lock
 - Non Invasive :
Wound Assessment
Vascular Assessment
Dressings
Splints
Compressive garments
Compression
Pressure redistributing support surfaces
- 5.00 pm End of meeting
